L'ATELIER DE MUSIQUE

FOMICHÈV

Technical rider

Equipment and travel arrangements are agreed separately for each performance.

01 DJ equipment

Send the player and mixer models, quantities, a booth photograph and the connection plan. Media format, channel count and the final setup are agreed for each set. For a vinyl performance, agree the turntables, cartridges and vibration isolation separately.

02 Sound and monitoring

Plan a working professional PA appropriate to the venue and independently adjustable artist monitors. Agree monitor placement and operating level during soundcheck, with hearing safety considered in the setup.

03 DJ booth

Provide a stable booth, clear access to the controls and practical equipment lighting. For outdoor stages, agree protection from rain, wind and direct sunlight in advance. The venue technical team prepares power and cable routing.

Technical rider

04 Preparation and crew

Test connections and playback media before the performance. Allow for soundcheck and artist changeovers in the schedule. Nominate a technician available throughout checks and the set, and send their name and phone number.

05 Lighting, screens and filming

Agree lighting, artwork using the artist's name and performance recording in advance. Use FOMICHÈV and the supplied brand assets. Do not present third-party logos or video content as the artist's own.

06 Confirmation checklist

Equipment models and quantities; stage layout; monitoring; soundcheck and set times; technical contact. Discuss equipment substitutions before the performance date.
